

October 2024 Admission
Application Guidelines for the Admission
to the Higher Agricultural Specialist Program for the Russian Federation Far East
for the Master's Degree at the Graduate School of Science and Technology, Niigata University

The Graduate School of Science and Technology, Niigata University, offers a program, the Higher Agricultural Specialist Program for the Russian Federation Far East, which was selected as one of the International Priority Graduate Programs (PGP), Advanced Graduate Courses for International Students, by the Ministry of Education, Culture, Sports, Science and Technology (MEXT). Therefore, the Graduate School of Science and Technology, Niigata University, accepts applications for October 2024 admission from those interested in pursuing a master's degree in this program as follows.

1. Program Outline

As the gateway from the Japanese sea coast to the world, Niigata University makes great efforts to promote education and research opportunities with East Asia and the Russian Federation. This program, based on a request from the Ministry for Development of the Russian Far East, provides a reorganized curriculum closely in line with requests obtained in field investigations in 2013 and aims to foster advanced agricultural specialists urgently needed by the Russian Federation and to nurture Japanese researchers who possess international as well as local perspectives. Student participants in this program will be matriculated at the Graduate School of Science and Technology, Niigata University, as full-time regular students and pursue a master's degree by taking required courses and conducting research within two years, the standard number of years required to complete the program.

2. Number of Students to be Admitted

Major	Number of Students	Major	Number of Students
Life and Food Sciences	Several	Environmental Science and Technology	Several

3. Eligibility for Application

An eligible applicant is considered to be someone applying as an international student, conforming to any of the conditions listed below.

- (1) Those who have graduated from a university stipulated in Article 83 of the School Education Law (Law 26 of 1947) or who expect to graduate by September 2024.
- (2) Those who have obtained a bachelor's degree according to the provisions of Article 104 Section 7 of the School Education Law or who expect to obtain such a degree by September 2024.
- (3) International applicants from countries which do not require sixteen years of school education before university graduation who fulfil the following two conditions, and who are deemed by the Graduate School to have academic ability equivalent to or greater than graduates of a Japanese university. **(Refer to Note)**
 - a. Those who after finishing university have engaged in research for a minimum of one year as research students or researchers at a university, research institute or equivalent institution either in Japan or another country or who expect to have pursued such research for a minimum of one year by September 2024.
 - b. Those who are 22 years old by September 30, 2024.
- (4) Those who have completed sixteen years of education in a country other than Japan or who expect to have completed such education by September 2024. **(Refer to Note)**

- (5) Those who have completed sixteen years of school education in a country other than Japan by taking lessons in Japan through a distance learning program provided by that other country or who expect to complete such education by September 2024. **(Refer to Note)**
- (6) Those who have completed or expect to complete by September 2024, in Japan, the curriculum of a university of a country other than Japan (limited to those who have completed a sixteen-year curriculum in the school education of that country) where this educational facility is recognized by the school educational system of that country and has been specifically designated by the Minister of Education, Sports, Culture, Science and Technology.
- (7) Those who have obtained a qualification equivalent to a bachelor's degree or who expect to obtain such a qualification by September 2024 in a university or other school in a country other than Japan (limited to those universities or schools whose general educational research activities have been recognized by a person certified by the government or relevant organ of that country or specifically designated as equivalent by the Minister of Education, Sports, culture, Science and Technology) and who have completed a course of study with a program of at least three years (including completion of that program by taking classes in Japan through distance learning provided by the school in the country concerned where the school is an educational institution recognized by the school educational system in that country and has been specifically designated by the Minister of Education, Sports, culture, Science and Technology). **(Refer to Note)**
- (8) Those who have completed after the date specified by the Minister of Education, Sports, Culture, Science and Technology or expect to complete by September 2024 a specialized course at a professional school specifically designated by said Minister (limited to courses of study of a minimum of four years and which reach the standards set by said Minister).
- (9) Those designated by the Minister of Education, Sports, Culture, Science and Technology
- (10) Those matriculated at a graduate school as specified in the provisions of Article 102 Section 2 of the School Education Law and who are deemed thereafter to have adequate academic ability to pursue education in the graduate school of this research department. **(Refer to Note)**
- (11) Those who by September 30, 2024 will have attended university for a minimum of three years as set out in Article 83 of the School Education Law, who are considered likely to obtain excellent results in the credits prescribed by this research department and who have completed fifteen years of school education in a country other than Japan. **(Refer to Note)**
- (12) Those who following individual screening of eligibility for application to this research department are approved as having academic ability equivalent to or greater than a university graduate and who will be 22 years old by September 30, 2024. **(Refer to Note)**

[Note]

Those eligible to apply on the basis of (3), (4), (5), (7), (10), (11) and (12) above should submit the “Application Forms” and the “Application Form for Eligibility Screening of Entrance Examination” to the program director by Monday, December 25, 2023.

Eligibility screening results will be announced individually by the program director on or after Wednesday, January 10, 2024.
