

Kazunari SHINBO, Dr. Eng.

Associate Professor

Program: Electrical and Information Engineering

Area: Electrical and Electronic Engineering

Undergraduate: Dept. of Engineering

Research Fields of Interest

His research interests cover the areas of electrical and electronic materials containing fabrications of nanostructured ultrathin films for electronic and optical devices. His special emphasis places on sensing of gas- and bio-molecules utilizing surface plasmon excitations and quartz crystal microbalance. He is a member of the Project of Nano-Electronic and Photonic Devices and Bioelectronics in the Center for Transdisciplinary Research, Niigata University. Three subjects of nanoelectronic devices, nanophotonic devices and nano-biodevices have been researched with two Profs. Futao Kaneko and Keizo Kato and Associate Prof. Akira Baba in the project.

Education

1995: Doctor of Engineering, Niigata University, Japan

1992: M. Eng. Department of Electronics, Niigata University, Japan

1990: B. Eng. Department of Electronics, Niigata University, Japan
